

Pratik Gadhav

AI Engineer | LLM Developer | Systems Architect

gadhavpratik621@gmail.com | +91 9511654379 | linkedin.com/in/pratik-gadhav-2b0b76387 | github.com/pratikgadhav211

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, C, JavaScript
- **Generative AI & Agents:** LangChain, LangGraph, Multi-Agent Systems, Model Context Protocol (MCP), FastMCP, Prompt Engineering, Tool Calling
- **Retrieval & RAG:** Advanced RAG, Hybrid Search, Graph RAG, Knowledge Graph RAG, Qdrant, FAISS, ChromaDB, Neo4j
- **Model Adaptation:** Supervised Fine-Tuning (SFT), LoRA, QLoRA, PEFT
- **AI/ML:** Machine Learning, Deep Learning, Neural Networks, TensorFlow, Keras, Hugging Face
- **Evaluation & Observability:** LangSmith, RAGAS
- **Backend & APIs:** FastAPI, Flask, REST APIs
- **Frontend & DevOps:** React, Docker, Git, Railway, Vercel
- **Databases:** MySQL, PostgreSQL, Neo4j, Qdrant, FAISS, ChromaDB

EXPERIENCE

Independent AI/ML & Systems Developer

2024 – Present

- Designed and deployed enterprise-grade machine learning solutions and advanced RAG pipelines, improving automated data processing efficiency by over 40%.
- Developed robust LLM-powered applications serving diverse use cases, refining prompt strategies to minimize inference overhead.

PROJECTS

Codebase Intelligence

GitHub Repository

- Engineered an Agentic AI platform designed to solve developer onboarding friction by automating large-scale codebase comprehension and vulnerability detection. Architected a stateful QA agent using LangGraph to maintain conversational memory and execute multi-turn reasoning across complex repository contexts.
- Core Technologies: LangGraph, Qdrant (Vector DB), Tree-sitter (AST Parsing), FastAPI, NVIDIA NIM (Llama-3.1).

HiveMIND – Multi-Agent AI System

GitHub Repository

- Designed and developed HiveMIND, a highly scalable, multi-agent LLM orchestration system built with LangGraph and exposed via a FastAPI backend.
- Engineered a robust evidence-gathering engine that combines local Retrieval-Augmented Generation (RAG utilizing FAISS and HyDE) with real-time web search integrations (Tavily, Serper, DuckDuckGo).

DocuMind-A Self Healing RAG Engine

GitHub Repository

- DocuMind is a highly resilient Retrieval-Augmented Generation (RAG) engine that autonomously prevents LLM hallucinations by evaluating and validating its own retrieved context.

EDUCATION

Dr. D. Y. Patil Institute of Technology

Pune, India

Bachelor of Technology (B.Tech.) in Computer Engineering | CGPA: 9.2/10

ACHIEVEMENTS

- Graduated with an excellent academic record, securing a CGPA of 9.2/10 and ranking among the top students in the computer engineering cohort.
- Delivered 3+ advanced generative solutions spanning Hybrid RAG, Multi-Agent ecosystems, and multimodal Self Healing RAG, demonstrating comprehensive expertise across the modern tech stack.
